Bleed: minimum 3 mm

Parts of your project that are designed up to the edge of the page need to be extended into bleed. This area is cut off during the manufacturing.

Open TrimBox:

95 x 476 mm

Margins: minimum 3 mm

It is recommended that no important texts or images are placed outside the inner margins set inside the TrimBox as well as out of the folding lines due to manufacturing tolerances.

- Crease for placement
-  Area is printable if needed (is visible when calendar pad is lifted)
-  non-visible area
- ... Trapping for up to the edge design elements
-  Assembly instructions in German (is printed automatically)

Make sure to remove the layout template and the assembly instructions from your print file!
