

The diagram shows a large magenta circle representing the final label. Inside it, a smaller circle is defined by a horizontal double-headed arrow. Above this arrow is the text 'Ø 106 mm (BleedBox)'. Below the arrow is the text 'Ø 100 mm (TrimBox)'. Further down, there are three lines of text: 'Bleed: min. 3 mm', a paragraph about bleed, 'TrimBox: Ø 100 mm', 'Margins: min. 2 mm', a paragraph about margins, and a line '— Cut contour = Final format'. At the bottom, a magenta box contains text about removing the template. In the bottom right corner, outside the circle, is the text 'Labels | round | Ø 100 mm'.

Ø 106 mm (BleedBox)

Ø 100 mm (TrimBox)

**Bleed: min. 3 mm**

Parts of your project that are designed up to the edge of the page need to be extended into bleed.  
This area is trimmed during further processing.

**TrimBox: Ø 100 mm**

**Margins: min. 2 mm**

It is recommended that no important texts or images are placed outside the inner margins set inside the TrimBox due to manufacturing tolerances.

— **Cut contour = Final format**

**Make sure to remove the layout template from your print file!**  
The cut contour must remain in the print file.
