## Bleed: minimum 2 mm

Parts of your project that are designed up to the edge of the page need to be extended into bleed. This area is trimmed off during the manufacturing.

## Open TrimBox:

148 x 234 mm

## Margins: minimum 5 mm

It is recommended that no important texts or images are placed outside the inner margins set inside the TrimBox due to manufacturing tolerances.

## --- Creasing line

Make sure to remove the layout template from your print file!
